

DECONTAMINATION UNITS INFECTION PREVENTION SOLUTIONS

For hospitals, office departments, clinics, hotels, food production areas and many more.

Hygiene lacks provides the spread of infectious contaminants. In disasters where sanitation is collapsed or not available the prevention of infections and deceases caused by contaminants is crucial for public health and personnel. Lack of hygiene in mobile instant clinics infects personnel and patients and acquire further hospitalisation

ULTRAVIOLET DISINFECTION MOBILE ROBOT

UVC light disinfection technology inactivates any remaining pathogens after manual cleaning processes. The UVD Robot is used as part of the regular cleaning cycle, and aims at preventing and reducing the spread of infectious diseases, viral, bacteria, and other types of harmful organic microorganisms in the environment by breaking down their DNA-structure. Kills 99.99% of all bacteria.

The robot is safe, reliable and eliminates human error. Furthermore, it is user friendly and is designed to be operated by every-day cleaning staff.

INNOVATIVE PORTABLE AND SCALABLE BIO-DECONTAMINATION SOLUTION

Common vaporized hydrogen peroxide H₂O₂ portable and scalable bio-decontamination unit eliminates all harmful contaminants on surfaces. High-quality product from Finland has significantly more powerful H₂O₂ generation than any other device with comparable size and weight. With a broad-spectrum activity it has a good penetration into hard to reach locations. It's environmentally friendly with a complete degeneration to harmless water and oxygen.

QUICK TO SET UP, POWER PANEL AND LIGHTS INCLUDED

High quality based on
innovative technology

- clean interior
- high load capability

Multipurpose, accommodation,
office, storage, medical, sanitary spaces

QUICK SPACE - MULTIPURPOSE FOLDABLE CONTAINER AND SPACE

Multipurpose sustainable container and modular space unit is a perfect solution to accommodate any space needs in disaster areas, public facilities, even as a temporary office or storage place. This is the fastest assembled modular space available in the market and the most cost-efficient solution both in transportation and in storing between uses.

VENTILATORS

Ventilators become an indispensable tool in the world's corona pandemic. This tool is claimed to help many corona patients deal with the disease. The need for a crucial ventilator to help cure coronavirus patients who often invade the respiratory tract, making Scope Asia take part in providing this tool. Scope Asia has various types of ventilators, invasive or non-invasive.

**KN95 Mask,
DDM-9500**

To prevent transmission of the coronavirus from patient to the front-line medical workers, mask is the most necessary thing to use. Having a good quality surgical mask is not only preventing the transmission of the virus, but also can reduce the amount of viral particles released.

FACE MASK

**3-ply
Face Mask**

- **How long does a KN95 mask last?** The KN95 disposable masks are effective for 8 hours.
- **How long does a Surgical Mask last?** Surgical masks can be worn for a maximum of 3 hours in a row.
